Seattle  
STD/HIV

PREVENTION TRAINING CENTER

This course is designed for clinicians new to caring for patients seeking STD-related care, and focuses on providing clinicians with *knowledge* and *skills* in conducting male and female STD exams. This includes taking a sexual history, basic anatomy, and examination skills practice taught in both a *didactic* and *hands-on* format using live model patients.

By the end of the course participants will be able to:

- Describe skills for effective patient/ provider communication in order to complete a sexual history and risk assessment for STDs and related reproductive health problems.
- List equipment necessary to perform a routine STD examination.
- Describe basic reproductive anatomy and perform an STD physical examination.
- Identify the sites from which specimens should be obtained and proper techniques in specimen collection.
- List the laboratory tests which are recommended for screening patients at risk for STDs.

**Faculty: Sue Szabo, PA-C**
